The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	Application No. 10/790,676	Applicant(s) KOKUBO, TAKESHI	
	Examiner Melur Ramakrishnaiah	Art Unit 2614	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, drawn to communication means in wireless circuit, classified in class 455, subclass 411.
  - II. Claims 5-7, drawn to communication means for communicating an electronic mail, classified in class 379, subclass 93.24.
  - III. Claims 8-9, drawn to transmitting specified data when receiving specified series of tone signals, classified in class 379, subclass 93.18.
  - IV. Claims 10-12, drawn to controller transmitting data by particular authentication schemes, classified in class 379 subclass 93.02.
  - V. Claim 13, drawn to inhibiting execution of authentication means, etc, classified in class 713, subclass 168.
  - VI. Claim 14, drawn to controller for shifting operation of authentication means of higher complexity, classified in class 713, subclass 166.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I, Group II, Group III, Group IV, Group V, Group VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions Group I is drawn to drawn to communication means in wireless circuit, Group II is drawn to drawn to communication means for communicating an electronic mail, Group III is drawn to transmitting specified data when receiving specified series of tone signals, Group IV is drawn to controller transmitting data by particular authentication schemes,

Group V is drawn to inhibiting execution of authentication means, etc, and Group VI is drawn to controller for shifting operation of authentication means of higher complexity.

3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
